

Computer Science Department
Web Application and Technologies (COMP 334)
First Semester 2025/2026

Assignment 1: HTML

Due Date 13/11/2025

Two-Part HTML Assignment

Assignment Type: HTML Structure and Semantic Elements Practice

Palestine Travel Company Website

Objective

Create a multi-page static website for a Palestinian travel and tourism company using proper HTML structure and semantic elements. This assignment focuses on mastering HTML5 semantic tags, proper document structure, and various HTML elements **without the use of CSS styling or JavaScript** functionality.

Assignment Overview

This assignment consists of two parts designed to help you master HTML5 structure, semantic elements, and proper web folder organization. Part 1 focuses on creating your personal portfolio website with proper folder structure on the hosting server. Part 2 involves creating a comprehensive multi-page website for a Palestinian travel company.

Part 1: Structure Your Website Folder and Create Your Home Page

Objective

Set up a well-organized web hosting structure and create a personal home page that will serve as the entry point to all your course work.

Step 1: Structure Your Website Folder

You need to take the following steps to structure your web folder effectively:

1. **Access the Hosting Server:**
 - Log onto the hosting server
 - Open the "public_html" folder
2. **Upload Your Home Page:**
 - Upload your home page file (index.html) to the "public_html" folder so it will be accessible to the public
3. **Create Main Folders:** Create three new folders in the "public_html" directory:
 - **ass** (for assignments)
 - **examples** (for course examples)
 - **project** (for projects)
4. **Create Index Files:** In each of these three folders, create a new file called "index.html," which will be the default web page displayed when visitors browse each folder.
5. **Create Subfolders:** To further organize your content, create a subfolder in each of the three main folders with a number assigned to it:
 - Within the "ass" folder, create a subfolder named "ass1"
 - Inside "ass1," create a file called "index.html"
 - Repeat this process for the other two folders, ensuring the subfolders and files are appropriately named
6. **HTML Examples Folder:**
 - Inside the "examples" folder, create a subfolder called "htmlEx"
 - Upload the HTML examples discussed in the lecture
 - Create an "index.html" file to refer to the examples

Expected Folder Structure:

```
public_html/
├── index.html (your personal home page)
├── ass/
│   ├── index.html
│   └── ass1/
│       └── index.html
├── examples/
│   ├── index.html
│   ├── htmlEx/
│   │   └── index.html
├── project/
│   ├── index.html
│   └── project1/
│       └── index.html
```

By following these steps, you'll have a well-structured and easy-to-navigate web folder, making it simple for visitors to locate what they're looking for.

Step 2: Create Your Personal Home Page

Create your personal home page using HTML elements to provide information about yourself. This page will serve as the main entry point to your website.

Required Sections:

1. Biography Section

Include a short biography about yourself with:

- **Personal Information:**
 - Full name
 - Student ID
 - Department in which you are studying
 - Contact information (email, phone - optional)
- **Address:** Your location or hometown
- **Photo:** A professional photo of yourself using the `<figure>` and `<img>` elements with appropriate alt text

2. Education Section

Provide details about your educational background:

- **School Education:**
 - Name of the school
 - Location
 - Period of study
 - Date of graduation
 - Link to the school website (if available)
- **University Education:**
 - Name of the university
 - Department/Major
 - Period of study (start date and expected graduation date)
 - Link to the university website
 - Title of the qualification/degree

3. Navigation Section

Create clear navigation links to your main website folders:

- Link to Assignments folder (ass/)

- Link to Examples folder (examples/)
- Link to Projects folder (project/)

Optional Sections (Recommended):

- Training and certifications
- Employment history or work experience
- Community and voluntary work
- Skills and interests
- Contact information

Technical Requirements for Home Page:

- Use appropriate semantic HTML5 elements (`<header>`, `<main>`, `<section>`, `<article>`, `<nav>`, `<footer>`)
- Use proper heading hierarchy (`<h1>` through `<h6>`)
- Include at least one image with proper alt attribute
- Use lists (`<ul>` or `<ol>`) where appropriate
- Include working navigation links using `<a>` tags
- Use `<figure>` and `<figcaption>` for your photo
- Ensure all HTML is valid and properly structured

File Requirements:

- The file must be named "index.html"
- Upload to the "public_html" folder on the CS host
- The page will be accessible at:
`http://web{STUDENT_ID}.studentswebprojects.ritaj.ps/` (where STUDENT_ID is your student ID number)

Full details on setting up your domain on the CS host are through the following links

- **Hosting Details and Login:** <https://www.youtube.com/watch?v=K0FFonWBp0c>
- **File Manager:** <https://www.youtube.com/watch?v=5CdMpCrVCVE>

Part 2: Palestine Travel Company Website

Learning Objectives

By completing this assignment, students will:

- Demonstrate proficiency in HTML5 semantic elements
 - Create well-structured, multi-page websites with proper navigation
 - Apply appropriate HTML tags for different types of content
 - Implement forms with various input types
 - Create accessible and properly formatted tables
 - Use images and figures with appropriate attributes
 - Understand the importance of semantic HTML for accessibility and SEO
-

Assignment Requirements

Required Pages

1. Homepage (index.html)

Create a welcoming homepage that introduces the travel company and its services.

Required Elements:

- Company name and logo using `<header>` element
- Navigation menu using `<nav>` with links to all pages
- Main content area using `<main>` element
- Featured destinations section using `<section>` elements
- Company news or announcements using `<article>` elements
- Sidebar with quick facts using `<aside>` element
- Company footer with contact information using `<footer>` element
- At least one company image using `<img>` with proper alt attribute

2. Destinations Page

Showcase various Palestinian cities and tourist destinations.

Required Elements:

- Multiple `<article>` elements for different destinations (Jerusalem, Bethlehem, Ramallah, Jericho, Hebron, Nablus, etc.)
- Each destination organized in `<section>` elements
- Images with `<figure>` and `<figcaption>` for each location
- Use `<aside>` for interesting facts or historical information
- Ordered or unordered lists `<ol>`, `<ul>` for highlights or attractions
- Internal links using `<a>` tags to connect related content

Example: For Jerusalem destination, include a heading with the city name, a figure with an image of a landmark (like Dome of the Rock) with a descriptive caption, a paragraph describing the city's significance, a list of top attractions (Al-Aqsa Mosque, Church of the Holy Sepulchre, Old City Markets), and an aside with a "Did You Know?" fact about the city's history or culture.

3. Tour Packages Page

Display available tour packages with detailed information.

Required Elements:

A. Main Packages Table

Create a comprehensive table with the following structure:

- **Table Caption:** Use `<caption>` element with descriptive title (e.g., "Available Tour Packages")
- **Table Header (`<thead>`):** Include columns for:
 - Package Name
 - Duration (days/nights)
 - Price (in USD or local currency)
 - Destinations Covered
 - Difficulty Level
 - Group Size
 - Availability
- **Table Body (`<tbody>`):** Include at least 5-7 tour packages with complete details, such as:
 - "Holy Land Heritage Tour" - 7 days - \$1,200 - Jerusalem, Bethlehem, Hebron
 - "Palestinian Culinary Journey" - 3 days - \$450 - Nablus, Ramallah, Jenin
 - "Historical Cities Explorer" - 5 days - \$850 - Jericho, Nablus, Sebastia, Jenin

- "Complete Palestine Experience" - 10 days - \$1,800 - All major cities
- "Weekend Getaway" - 2 days - \$300 - Jerusalem and Bethlehem
- "Nature and Adventure Tour" - 4 days - \$650 - Wadi Qelt, Dead Sea area, Jordan Valley
- "Cultural Immersion Program" - 6 days - \$950 - Multiple cities with homestay
- **Important - Linking Package Names:** Each package name in the table should be a hyperlink that jumps to its detailed section below. Use the anchor tag `<a>` with href attribute pointing to the corresponding details section.
- **Table Footer (`<tfoot>`):** Include summary information such as:
 - Note about prices (e.g., "All prices include accommodation and guided tours")
 - Discount information
 - Contact information for custom packages
- Proper use of `<th>` elements for all header cells with scope attributes (scope="col")
- Proper use of `<td>` elements for all data cells
- Consider using `rowspan` or `colspan` for special offers or featured packages

B. Detailed Package Information Sections

Below the main table, create individual sections for each package using `<details>` and `<summary>`:

- **ID Attribute:** Each `<details>` element must have a unique id attribute that corresponds to the href link from the table above
- **Package Name** in `<summary>` element (clickable to expand)
- **Important:** The package name in the `<summary>` must match the package name from the table above
- **Navigation Requirement:** When users click a package name in the table, the page should jump to that specific package's detailed section
- **Expandable Content** within `<details>` should include:
 - **Day-by-day Itinerary:** Use ordered list `<ol>` showing:
 - Day 1: Arrival and activities
 - Day 2: Specific sites and activities
 - Day 3: Continued itinerary
 - etc.
 - **Included Services:** Use unordered list `<ul>` showing:
 - Accommodation (hotel category)
 - Meals (breakfast, lunch, dinner)
 - Professional tour guide
 - Transportation
 - Entrance fees to sites
 - Travel insurance
 - **Not Included:** Use unordered list `<ul>` showing:
 - International flights

- Personal expenses
- Optional activities
- Tips and gratuities
- **Requirements:** Use unordered list `<ul>` showing:
 - Valid passport
 - Travel visa (if needed)
 - Travel insurance
 - Minimum fitness level
- **Additional Information:** Paragraph format with important notes

Example: If your table lists "Holy Land Heritage Tour" as a package, you must:

1. Make the package name in the table clickable so it navigates to the detailed section below
2. Create a details section with a unique identifier that corresponds to the link from the table
3. Use the exact same package name in the summary element

Inside the details, include an ordered list for the 7-day itinerary (Day 1: Arrival in Jerusalem and Old City tour, Day 2: Visit Al-Aqsa Mosque and Dome of the Rock, etc.), and unordered lists for what's included (6 nights in 4-star hotels, daily breakfast, professional guide, transportation) and what's not included (international flights, travel insurance, personal expenses).

C. Comparison Table (Optional)

Create a second table comparing key features of packages:

- Rows for different features (meals included, guide language, transportation type, accommodation level, etc.)
- Columns for each package name
- Use checkmarks or "Yes/No" to indicate inclusion

D. Special Offers Section

Use `<aside>` element for:

- Seasonal discounts
- Group booking benefits
- Early bird offers
- Student/senior discounts

4. Booking/Contact Form Page

Create a comprehensive booking form for customers.

Required Form Elements:

- Text inputs: name, email, phone number
- Date inputs: travel start date, travel end date
- Select dropdown menus: destination selection, number of travelers
- Radio buttons: tour type (group tour, private tour, custom tour)
- Checkboxes: additional services (hotel booking, tour guide, transportation, meals)
- Textarea: special requests or comments
- Submit and reset buttons
- Use `<fieldset>` and `<legend>` to group related form fields
- Proper `<label>` elements for all inputs
- Required attributes where appropriate

5. About Us Page

Provide information about the company and its team.

Required Elements:

- Company history and mission in `<article>` format
- Team members section with images using `<figure>` and `<figcaption>`
- Company values or achievements using lists
- Multiple `<section>` elements to organize different aspects
- Contact information and office location

Example: Create a section for "Our Team" with at least 3-4 team member profiles. Each team member should have a figure containing their photo with a caption showing their name and position (e.g., "Ahmad Hassan - Founder & CEO"). Below each figure, include a paragraph describing their background, experience, and role. Create another section for "Our Values" with an unordered list of company values (Authenticity, Sustainability, Safety, Expertise, Respect), and a section for "Our Achievements" listing accomplishments like number of satisfied customers, awards won, or certifications.

6. Gallery Page

Display images of Palestinian landmarks, culture, and tourism.

Required Elements:

- Multiple `<figure>` elements with `<figcaption>` for image descriptions

- Images organized in `<section>` elements by category (historical sites, natural landscapes, cultural events, cuisine, etc.)
- Proper use of alt attributes for all images
- Optional: links to detailed destination pages using `<a>` tags

7. FAQ Page (Optional but Recommended)

Answer frequently asked questions about travel to Palestine.

Required Elements:

- Multiple `<details>` and `<summary>` elements for collapsible Q&A
- Questions organized by topic using `<section>` elements
- Use of lists where appropriate for multi-part answers

Technical Requirements

1. **Valid HTML5:** All pages must use proper HTML5 doctype and validate without errors, validate your web pages with W3C HTML Validator: <https://validator.w3.org/>
2. **File Organization:** All files should be organized in a clear folder structure
3. **Naming Conventions:** Use lowercase, hyphen-separated filenames (e.g., tour-packages.html)
4. **No CSS or JavaScript:** Focus on HTML structure only
5. **Proper Nesting:** All elements must be properly nested and closed
6. **Semantic Meaning:** Use semantic elements based on content meaning, not appearance
7. **Accessibility:** Include alt attributes for images and proper labels for form inputs
8. **Navigation:** All pages must be accessible through navigation links

Content Guidelines

1. **Destinations:** Include at least 4-6 Palestinian cities or tourist sites
 2. **Tour Packages:** Create at least 3-5 different tour packages
 3. **Images:** Use at least 10-15 images throughout the site (can use placeholder images)
 4. **Realistic Content:** Provide meaningful, realistic content related to Palestine tourism
 5. **Cultural Sensitivity:** Ensure content is respectful and culturally appropriate
-

Submission Requirements

Live Website:

- Your personal home page must be live and accessible at:
http://web{STUDENT_ID}.studentswebprojects.ritaj.ps/
- All folder structure must be properly set up on the CS host
- All navigation links must be working

ITC submission:

1. Create a ZIP file containing:
 - All HTML files for part1 and part 2 of the assignment
 - An images folder with all images used
2. **File Structure Example for Part 2:**

Ass1/

```
|— index.html
|— destinations.html
|— tour-packages.html
|— booking.html
|— about.html
|— gallery.html
|— faq.html
|— images/
|   |— logo.jpg
|   |— jerusalem.jpg
|   |— ...
|— .....
```

3. **Submission Deadline:** [13/11/2025]. All of your course assignments and the project must be uploaded to CSHost, and **grading will be only for the files uploaded to your folder on the CSHost**. Also, you **must** compress (Zipped) all your files (home page and Community of Practice website files) to a file named assOne-stlD.zip, where stlD is your student ID, and **submit** them to ITC before the due date. **Work will be graded only if it is correctly submitted to both CShost AND ITC.**

Academic Integrity

This is an individual assignment. While you may discuss general concepts with classmates, all code must be your own work. Copying code from online sources or other students will result in academic penalties.

Good luck with your assignment!
